

10th European Turbomachinery Conference

April 15 -19, 2013
Lappeenranta, Finland

www.etc10.eu
www.euroturbo.eu

Call for Sponsors

Following the successful first nine conferences on turbomachinery held in Erlangen (DE) 1995, in Antwerpen (BE) 1997, in London (GB) 1999, in Florence (IT) 2001, in Prague (CZ) 2003, in Lille (FR) 2005, in Athens (GR) 2007, in Graz (AT) 2009, and in Istanbul (TR) 2011, the tenth will take place in April 2013 in Lappeenranta (FI).

The ETC-10 conference will be of primary interest to researchers, design engineers, users of turbomachinery components as well as to students and PhD candidates allowing presentation and discussion of their most recent scientific results.

The impact of the topics treated within the conference have a strong effect on the industrial activities and could lead to added value in their own research and development area. The improved knowledge and the information resulting from the technical sessions and invited lectures by leading scientists and/or industrial technology producers should result in added value to the industrial policies.

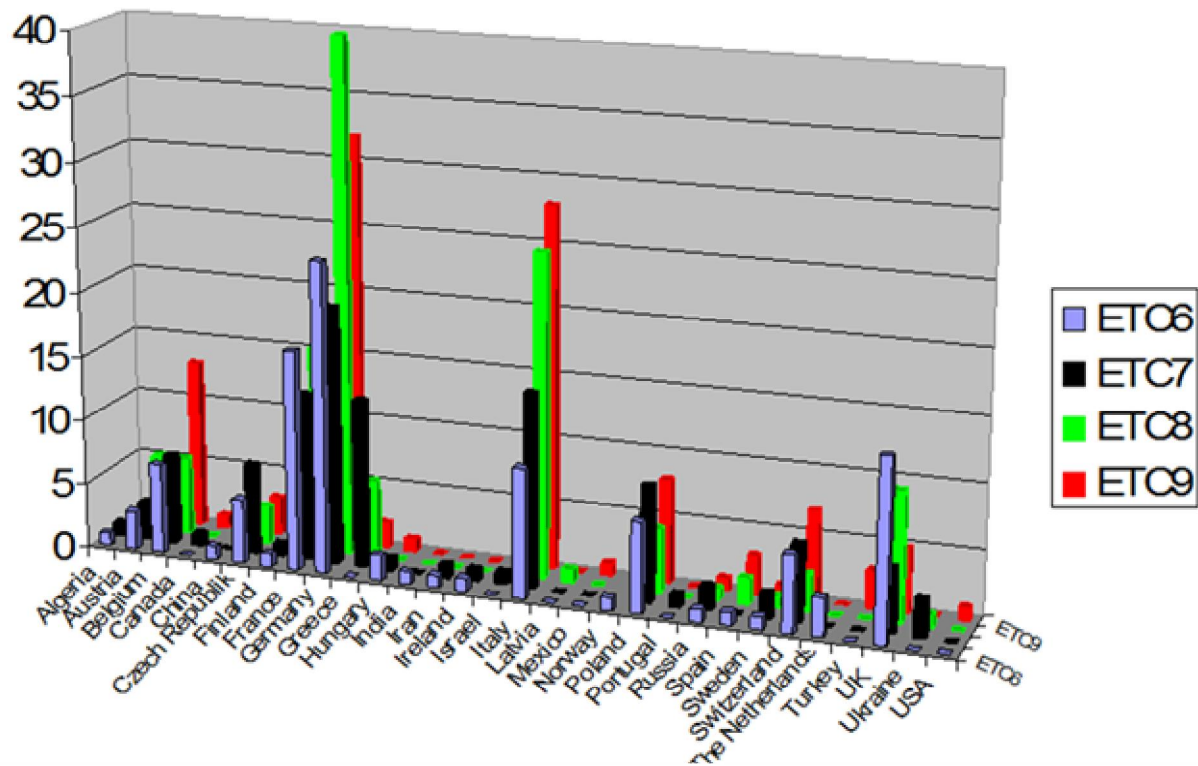

The number of attendees of the previous ETC Conferences :

- 2011, Istanbul, Turkey : 270
- 2009, Graz, Austria : 250
- 2007, Athens, Greece : 215
- 2005, Lille, France : 202
- 2003, Prague, Czech Republic : 238
- 2001, Florence, Italy : 195

The table below shows the distribution of the papers with at least one author from industry as well as the papers acknowledging support from the European Union. A large increase of industrial involvement was noted in Graz (2009). The number of the papers, with at least one author from the industry, was 108 (86 % share of total) at ETC8 Graz Conference.

Affiliation all Authors					
	ETC7		ETC8		
<i>Papers with at least one author from industry</i>	31	27 %	108	86 %	+248 %
<i>Papers acknowledging UE support</i>	18	16 %	25	20 %	+25 %

The following graph shows number of papers received and finally accepted, considering the country of the first author. The bulk of the contributions stems from the EU countries, but there are also significant contributions from Switzerland and UK. As the conference is nearer to St. Petersburg than Helsinki, the actions to clearly increase the Russian participation is strengthened.

130 Papers and 3 invited lectures were presented in 30 sessions at the ETC9 Istanbul Conference.

Conference Venue

The conference will be held at the Skinnarila Campus of the Lappeenranta University of Technology.

Sponsorship

We offer you sponsorship opportunities and are looking forward to your participation to the Conference. There are two categories of sponsorship packages.

Small Package 5 000 € (VAT 0%)

- Logo and name on back side of the front cover of the Conference Technical Program
- Logo and name on back cover of the Conference Proceedings Book and CD
- Featured logo and sponsor website link on ETC10 Website's main page etc10.eu
- Logo / Name listed as Sponsors on posters at conference venue foyer and registration area
- An Exhibit booth (2.5 m x 2.5 m), a table, 2 chairs, 3 electric sockets 220 V, wlan

Grand Package 10 000 € (VAT 0%), limited availability

- Small Package
- Complimentary full conference registration for one representative:
Sessions, Coffee breaks, Welcome Reception, Gala Dinner, Conference Proceedings Material
- Presentation Opportunity
- Logo and name on the conference bag

For more information on becoming a sponsor, please contact the Chairman of the Local Organizing Committee :
